STICKY STRIPS™ (Disposable) INSECT TRAPS

For Staked or Tied Plants

Position the top of the Sticky Strip slightly above the top of the plant canopy.

Garden and Field Use

On the ground with sticky side up

Peel the protective covering off the Sticky Strip. Hang the Sticky Strip, put it on a Sticky Strip Stake, or lay it on the ground, depending on what you are trapping.

The Sticky Goo can be removed from hands with waterless hand cleaner or vegetable oil. Store standing with ungummed edge up.

For Potted Plants

Position the bottom of the Sticky Strip a few inches above the plant canopy.
