

JACKSON TRAP ASSEMBLY INSTRUCTIONS

ITEM LIST:

- 1 Jackson trap
- 1 Insert (CAUTION: STICKY)
- 1 Insect Technical Bulletin/Trap Assembly Instructions

OPTIONAL:

- 1 Basket Dispenser
- 1 Clip

ASSEMBLY

1. Separate the inserts. Put a sheet of wax paper or foil over the sticky side of the extra insert if necessary for storage.

2. Open the body of the Jackson trap to form a triangular shape.
3. Open the pheromone and place in the basket. (Avoid touching the pheromone surface with bare fingers). Put the basket on the metal hanger. Attach this hanger to traps as illustrated.
4. Optional: Place lure on clip and attach to trap as shown.
5. Slide one insert into the trap, sticky side up.
6. Replace inserts when dirty or covered with insects.

NOTE: To prolong storage life, refrigerate or freeze unused pheromones in their packet. Use of tweezers or rubber gloves for handling pheromones is recommended to avoid contamination, especially if traps for more than one insect are being prepared.
